

Mini-lease

Like most businesses, yours almost certainly requires a high level of flexibility when it comes to meeting vehicle needs.

ORIX has recognised that long term leases don't suit every situation – and that rental vehicles are often an expensive alternative for short to medium term requirements. The answer is an ORIX Mini-lease which gives you easy access to an extensive short term lease fleet at corporate rates.

The ORIX difference

ORIX Mini-lease vehicles are available to ORIX customers *and* their staff – providing greater flexibility and convenience at lower rates than renting the same vehicles commercially.

We also offer Mini-lease vehicles with unlimited kilometres, so you won't have to worry about travel restrictions or excess kilometre charges.

As with Fully Maintained Operating Leases or rental vehicle arrangements, ORIX takes care of full vehicle maintenance services for you, saving you another headache.

A flexible, economical alternative

An ORIX Mini-lease gives you cost effective use of the vehicle you need to meet short term demands, from one day to 12 months. It's an economical alternative to renting vehicles for new staff, guests, special projects, periods of peak demand or one-off trips (to a trade fair or conference, for example). Mini-lease vehicles can also help keep your business on track if a fleet vehicle is unavailable due to breakdown, accident or theft.

The largest Mini-lease fleet in Australia

ORIX owns a fleet of more than 400 fully maintained passenger and light commercial vehicles, positioned in capital cities across Australia, to provide you with convenient, easy access to the vehicle you need, when you need it. Vehicles are available from ORIX offices and selected towing depots, or we can arrange delivery for a modest fee.

Our strategic partnership with a national preferred rental partner supplements our fleet with a wide selection of additional vehicles, at our specially negotiated rates.

This gives you dependable access to a large pool of vehicles. We can offer you anything from a 4-cylinder hatchback to light commercial vehicles, so you can drive a vehicle that is both familiar and suited to the task.
